COLLAGEN PROTEIN

FOR JOINT HEALTH

SOURCE: PAUL ANDRESS, NUTRICOL LTD

OUR BIOACTIVE COLLAGEN PEPTIDES ARE SCIENTIFICALLY PROVEN TO IMPROVE JOINT HEALTH

Change in the joint cartilage after 3 months (tissue sections*)

Progression before treatment

Progression after treatment

*Oesser S et al. (2007) Osteoarthritis Cartilage 15: C61-C62, 94

- Are the only measurable health ingredient with the CRI (Collagen Research Institute) approved for its effect on stimulating the enhanced building of joint cartilage
- Has a higher stimulatory effect compared to other Collagen Peptides proven in CRI preclinical studies
- Stimulates cartilage cells to produce new collagen and proteoglycans and has a regenerative effect on joint cartilage. In contrast, Glucosamine and Chondroitin has an effect mainly limited to anti-inflammatory
- The most extensive preclinical and clinical studies conducted

WIDE RANGE OF APPLICATIONS

GOLDSHIELD: UK

VALEANT: POLAND

VITARESEARCH: ITALY

SWANSON: USA

SQUEEZY: GERMANY

ATRO PROVITA: GERMANY

BERRY: EN: GERMANY

COHYDROL: MEXICO

PROMARCON: GERMANY

SANOFI: AVENTIS

ZDROVIT: BULGARIA / ROMANIA
