VERISOL SUPPLEMENTS BEAUTY

CLINICALLY DEMONSTRATED RESULTS

PRODUCT CLAIMS:

- Decreases the appearance of wrinkles*
- Helps to improve skin elasticity & skin surface structure*
- Helps to improve skin tonicity & skin firmness*

*with 2.5g VERISOL. Food Supplements Europe provide guidance to use beauty claims.

SIGNIFICANT IMPROVEMENT

OPTIMISED FOR BEAUTY

VERISOL consists of special collagen peptides – important components for supporting healthy skin. Administered orally, VERISOL influences the skin's collagen metabolism directly from the inside. It increases the skin moisture and slows down the formation of wrinkles. Several scientific experiments investigated the potential of VERISOL.

Higher skin elasticity

The first study with 69 women aged between 35 and 55 years revealed that VERISOL leads to significantly higher skin elasticity – up to 15% – compared to placebo treatment. This effect could be measured after just 4 weeks of treatment and persisted after 8 weeks of oral VERISOL administration.

Another 4 weeks after the last intake of the product, VERISOL application still showed higher skin elasticity levels than in the placebo treated group by trend.

STUDIES AVAILABLE UPON REQUEST

Orally administered, this product systematically affects the collagen metabolism in the dermis rather than just reaching the outer layers of the skin as do creams and other topical products.

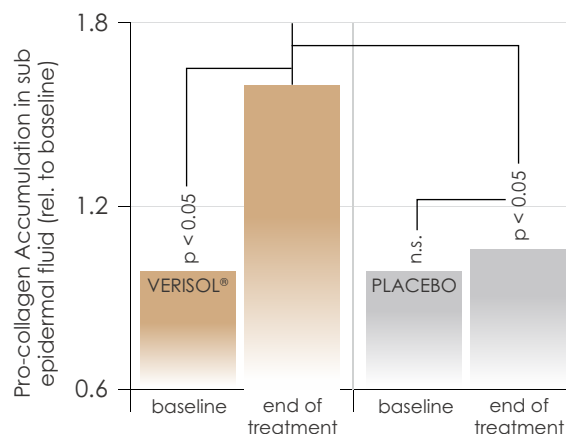

Skin elasticity increased significantly after oral VERISOL® treatment in comparison to placebo administration.

VERISOL® significantly reduces wrinkles: The collagen in the skin increases by 60%.
